

INTERPARFUMS

2022 carbon footprint (2021 figures)

Interparfums' total carbon footprint is calculated in accordance with international standards, and namely the Green House Gas Protocol (GHG Protocol) for the conversion of all emission sources into tons of CO₂ equivalent and the Base Carbone®, a public database of emission factors made available by the French Agency for Ecological Transition (ADEME).

- 2021 Carbon footprint: **174,930 tCO₂e**
- 2021 Carbon intensity: **312 KgCO₂e per € thousand of revenue** (in the low range of our industry)

In tons CO ₂ equivalent	2021	Poids
Scope 1 (gas and fuel energy consumption)	226	0,1%
Scope 2 (electricity consumption)	29	0,0%
Scope 3 (other indirect emissions)	174,675	99,9%
Total	174,930	100,0%

Main Scope 3 emissions
